

KILLS FLYING AND CRAWLING INSECTS

For Residential and Commercial Use

INTERIOR EXTERIOR

Residential Sites: For use as a crack and crevice and spot treatment only on non-food contact painted, sealed or metal surfaces around points of entry including underneath the sink, in back of stoves and refrigerators, on and along baseboards, around windows and doors, back of cabinets and desks in homes. Do not use for broadcast interior home application such as entire walls, ceilings and floors.

**Easy Water Clean-up
Product of USA
SHAKE WELL BEFORE USE**

Active Ingredients:	
Permethrin (3-Phenoxyphenyl) methyl (+or-) cis-trans-3- (2,2-dichloroethenyl) 2,2-dimethylcyclopropanecarboxylate)	2.00%
Other Ingredients:	98.00%
Total	100.00%

Net Contents: 1 gallon (3.785L)
KEEP OUT OF REACH OF CHILDREN
CAUTION
See Back Panel For Additional Precautionary Statements

Industrial, Commercial, Agricultural and Sports Sites: For use in non-food/feed areas as a crack crevice and/or spot treatment on non-food contact painted, sealed or metal surfaces such as walls, ceilings, masonry and concrete, loading and unloading docks and garbage disposal areas of buildings including apartments, offices, warehouses, hospitals, hotels, motels, schools, restaurants, theaters, horse barns, dairy barns, swine barns, chicken houses, animal hospitals, kennels, hunting and fishing lodges, prefabricated hunters' look-outs, in sewer manholes, and also for control of fire ants and spiders in and around electrical equipment. May also be applied onto fiber products including netting and tents as well as onto strips of burlap for the control of gypsy moths.

Precautionary Statements—Hazards To Humans and Domestic Animals

CAUTION

Harmful if swallowed, inhaled or absorbed through the skin. Causes moderate eye irritation. Do not breathe vapors or spray mist. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling.

First Aid

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
If swallowed: Call a poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. **Do not give anything by mouth to an unconscious person.** Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
Note to Physician: None

Environmental Hazards

This product is toxic to fish, birds and other wildlife. Do not contaminate water when cleaning equipment or by disposing of equipment wash waters. Do not apply directly to water. Apply this product only as specified on this label.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Provide ventilation of area during application. Insure that all surfaces are clean and dry prior to applying this product. Each gallon covers approximately 500 square feet. This ready-to-use product should be stirred thoroughly prior to application. Wear rubberized gloves during application. Apply with brush, roller or handled pad applicator, or by coarse, low pressure spray. For best results, use without dilution. If necessary, dilute with up to 5% water. Do not apply this product in occupied patient rooms or in any rooms/areas while occupied by patients, the elderly or infirm. Do not apply in classrooms when in use. Do not apply to institutions (including libraries, sports facilities, etc.) in the immediate area when occupants are present. Do not use in food/feed areas of food/feed handling establishments, restaurants, or other areas where food/feed is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are the areas where prepared foods are served such as dining rooms but excluding areas where food may be prepared or held. In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed. Non food/feed areas where this product can be applied are areas such as garbage rooms, lavatories, floor drains (to sewers), offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).
CRACK AND CREVICE TREATMENT: Apply Insecta as a coarse, low pressure (20 PSI or less) spray with equipment capable of delivering a pinstream of insecticide directly into openings leading to voids and hollow spaces in walls, equipment legs and bases, or at points that occur between different elements of construction or especially where equipment joins floors and walls. Use an applicator fitted with needle injector or equipment capable of delivering a pinstream of insecticide. Use equipment with plastic rather than rubber hoses because the solvents in the insecticide may cause collapse of the rubber. Prior to application, de-energize equipment and allow time for solvent to evaporate before starting motors or placing on "ON" position. Do not apply Insecta on or near flames or heated surfaces. Greatest residual efficacy is achieved when Insecta is applied over painted, sealed or metal surfaces.
SPOT TREATMENT controls cockroaches, ants, crickets, silverfish and aids in the control of pantry pests. Apply Insecta with a 3 in to 4 in brush, roller or handled pad applicator to localized areas where these pests have been seen or are suspected of hiding or entering. Apply only enough to wet the surface. Avoid runoff. Do not allow the insecticide to contact food or food processing surfaces.

To achieve maximum residual efficacy, whenever possible apply Insecta over painted, sealed or metal surfaces. Areas to be treated include around plumbing and other utility installations, dark corners and closets, along and on baseboards, moldings, around doors, windows, ventilators and other openings. Apply adjacent to tin paneling or other material loosely attached to walls. Completely band the underside of work tables and storage shelving but never on the exposed work storage surface. Remove all drawers and band the three sides but never the interior or front. Floor drains, garbage rooms and locker rooms should be included in treatment. Treated surfaces should not be washed or cleaned for 36 hours after application.

FOR CONTROL OF FIRE ANTS, spiders, wasps and other insects nesting or harboring in electrical equipment including, but not limited to, electrical transformer boxes, telephone switch gear boxes, air conditioner cabinets, traffic signal and light standards, pump houses, around swimming pool equipment, underground equipment vaults, field radar and navigation equipment installations. Apply this product to the interior and exterior of the corners, joint access doors and panels, and sides of equipment housing. Application to the interior of such installation must be made when equipment is not in operation and surfaces must be dry before placing equipment back in service. Do not apply to electrical connectors or components. Product may be applied by coarse, low pressure spray or suitable brush or applicator. Shop performed applications (before equipment is installed) may be made via coarse spray using conventional airless spray equipment.

TREATMENT OF SEWER MANHOLES: (For control of roaches). Apply product on painted or sealed manhole walls. Product may be applied via coarse spray using conventional airless spray equipment or by applying with suitable brush or roller. Apply no more than 48 ounces (3 pints) of product to each manhole. Do not discharge spray or unused material directly into sewer system. Do not apply product within 36 hours of predicted heavy rainfall.

FOR CONTROL OF GYPSY MOTHS: (How to use instructions). **For use on trees:** To control instar 1 caterpillars, application must be done before they move off of the egg masses. Put one wrap of 12 inch wide burlap around the tree. Fasten with two pieces of twine with one placed in the center around the burlap and other near the top of the burlap. Apply a thorough coating of this product onto the burlap. This product is applied with a brush or a coarse spray from a trigger pump spray bottle. When the caterpillars grow to their instar 3 stage, remove the top twine to allow the burlap to fold over the middle twine.

For Use On Vertical Structures: To control caterpillars on flat surfaces, apply 12 inch wide burlap to the bottom of the surface or to a board along the bottom of the surface and apply a thorough coat of this product. The burlap should be tacked in the middle and on the top. When the caterpillars grow to their instar 3 stage, remove the top tacks to allow the burlap to fold over the middle tacks.

Your local nursery will help with the instar timing in your area. After the gypsy moths pupate, remove the burlap and discard. **ATTENTION:** Dries quickly and rinses easily with water. Allow to dry for several days before washing. Wash brush, roller, applicator or spraying equipment thoroughly with soap and water after use. As contact between the insect and the treated surface is necessary, any time that the latter becomes coated with dust or dirt, the treated surface should be washed with water in order to re-establish maximum possible contact. INSECTA applied on exposed glass, glazed tile, metal or other non-porous surfaces may dry leaving a light film.

KILLS BY CONTACT: Cockroaches, ants, spiders, flies, mosquitoes, ticks, gnats, palmetto bugs, silverfish, earwigs, crickets, fire ants, and gypsy moths.

Storage and Disposal

Do not contaminate water, food or feed by storage and disposal.

Pesticide Storage: Store away from freezing temperatures.

Pesticide Disposal:

If empty: Do not reuse this container. Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

NOTICE

Seller warrants that this product conforms to its chemical description and is reasonably fit for purposes stated on the label when used in accordance with directions under normal conditions of use. Neither this warranty nor any other warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE, expressed or implied, extends to the use of this product contrary to label instructions or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
